Re: Melvin K. Silverman date of birth 03/24/1943

This patient is a 72-year-old man who had an acute cerebrovascular accident on 02/17/2016. He was hospitalized at that time at Holy Cross Hospital in Fort Lauderdale, Florida. He was found to have a blood stream infection, which involved 2 of his heart valves. After he was stabilized. He was taken to the operating room and had open heart surgery to replace the 2 infected valves. He continued on intravenous antibiotic therapy and in fact, he is still getting such therapy, daily through a long term intravenous catheter. He underwent intensive physical therapy and was finally discharged from the hospital on 03/17/2016.

Sincerely,

Michael J. Dolchin, M.D.
